

Part B: Practical Implementation

Mean, Median, Mode: -

```
Mean Income = 82915.798
Median Income = 79446.5
Mode Income = 20055
```

Standard Deviation: -

```
Range = 947901
Variance = 80185292594.9569
Std Dev = 283170.0771532135
```

Probability of Default: -

```
Probability of Default = 0.27
```

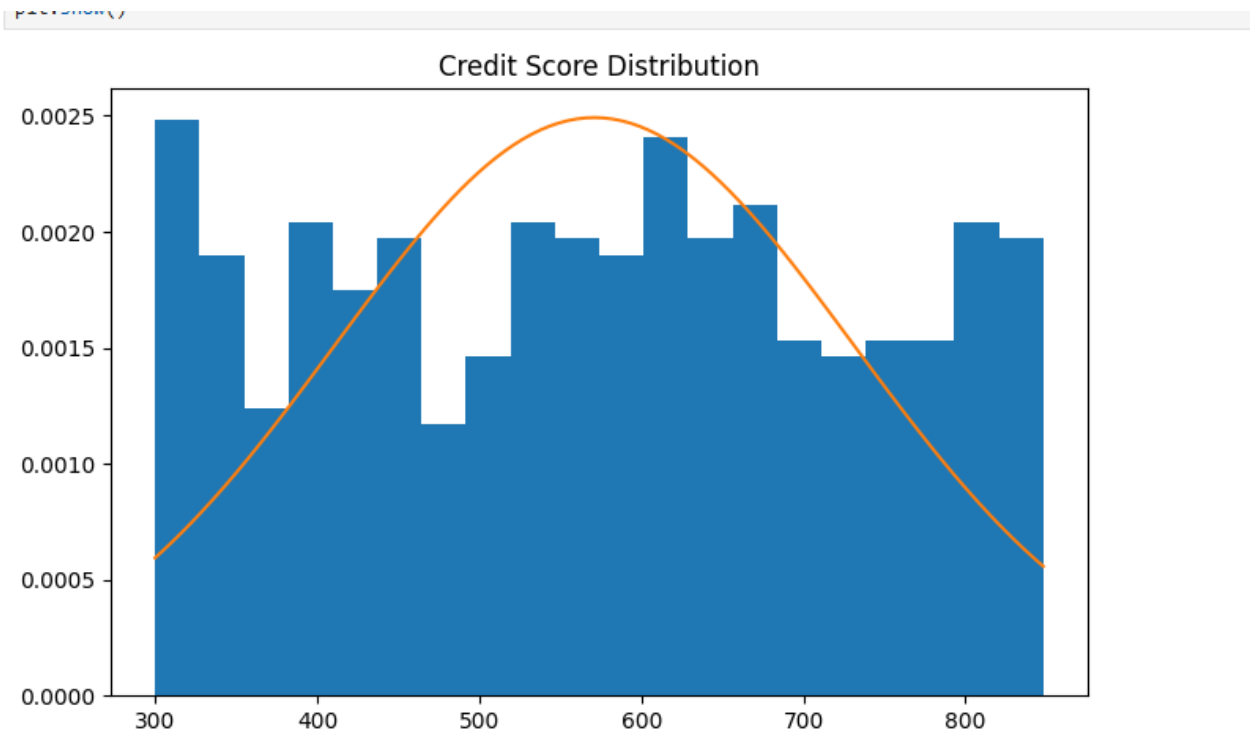

Credit Range: -

Default_Status	No	Yes
Credit_Range		
Low	136	135
Medium	107	0
High	121	0

Credit Score: -

```
conditional_prob)
P(Default | Credit Score < 600) = 0.503731343283582
```

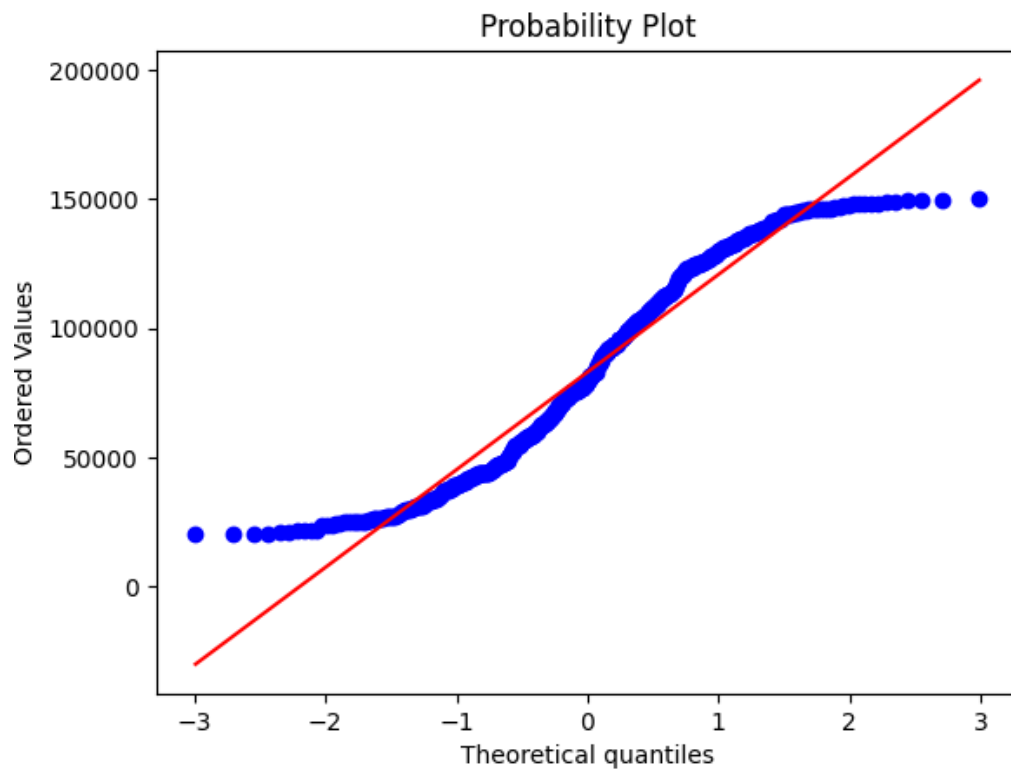

Histogram: -

Skewness Kurtosis: -

```
Skewness = 0.04647174011467382  
Kurtosis = -1.2521224817465353
```

Q – Q plot: -

Dot product: -

```
Dot Product = 689288351304
```

Norm: -

```
Norm = 812943.61815073
```

Angle: -

```
Angle = 0.08379156405367026
```
